

Olives harvester
GREGOIRE G10.330

GREGOIRE

PASSEZ À L'AVENIR*

GREGOIRE technology
for olives harvesting

G10.330

*SHIFT TO THE FUTURE

6 reasons to choose **G70**

Thanks to his strong experience in the olives harvest, **GREGOIRE** brings you its ultimate solution for high and super high density olive harvest.

Efficient engine :

Engine **DEUTZ** 4 cylinders :

- 156 horsepower
- Easy work even in the hardest conditions
- Low consumption

Reliable transmission :

4 wheel drives transmission :

- Easy work even in the hardest conditions
- Standard anti-skid
- 2 transmission modes : road or harvest

Quiet harvest :

Require the **GREGOIRE** original spare parts :

- Long life pan
- No harvest immobilization
- Limited maintenance cost

Simple and intuitive controls :

Ergonomic joystick :

- Lifting and slope correction control
- On/off picking head components control
- Anti-skid control
- Transmission control

Intuitive screen :

- Complete information display
- Centralized data screen : all info available in one glance
- Tractor base and picking head informations accessible in real time

Intuitive control box :

- Compact control box : no loses of place on cab
- Intuitive drawings : simple machine settings
- Close to the driver : easy settings in real time

The smoothest picking head on the market :

Total respect of the vine :

- Pendulum picking head : natural movement
- Hydraulic pinch setting from drivers cab : easy and fast, adjustment for all trees types

ARC shakers and straight shakers :

- Exclusive material : great reliability, elevated life pan
- The perfect union between ARC shakers and straight shakers for a total harvest (outside and inside of tree)
- ARC shakers, exclusive shape : External olive are perfectly picked
- Straight shakers : excellent intrusion inside the tree

GREGOIRE scale : perfect water tightness

- Monobloc and thermoformed scale : no maintenance
- Return in position thanks to the material: limited maintenance costs

GREGOIRE belt :

- Double driving system , no skid : limited maintenance costs
- GREGOIRE buckets : perfect olives conveying
- simple belt routing : no stress on belts

Easy daily maintenance :

No close of day obligation :

- Easy washing
- Fast maintenance
- Accessible components

For Olives

Minimum row spacing	2.2m
---------------------	------

Ground clearance	2.5m
------------------	------

Engine

Brand	Deutz
-------	-------

Cylinders	4
-----------	---

Engine size	4 100
-------------	-------

Power ISO / engine speed	156cv/2100 rpm
--------------------------	----------------

Fuel tank capacity	175
--------------------	-----

Transmission

4 wheel drive	Standard
---------------	----------

Anti skid	Standard
-----------	----------

Speed control	Standard
---------------	----------

Oil tank capacity	125
-------------------	-----

Filtration	on return and suction
------------	-----------------------

Tilt correction	510mm/25%
-----------------	-----------

Front/rear tyres	380/85R24 / 440/80R28
------------------	-----------------------

Picking head

Shakers	56,ARC + rod
---------	--------------

Hydraulic pinch setting	Standard
-------------------------	----------

Number of catcher trays	2 x 23
-------------------------	--------

Waterproofing Length (mm)	3520
---------------------------	------

Minimum harvesting height	- de 15 cm
---------------------------	------------

Conveyor width	320
----------------	-----

Tunnel width	1050
--------------	------

Conveyor speed	Adjustable & Reverse
----------------	----------------------

Conveyor alarm	Standard
----------------	----------

Centralized greasing points	Standard
-----------------------------	----------

Cleaning

Aspiradores inferiores / superiores	Option
-------------------------------------	--------

Extractores verticales	Option
------------------------	--------

2xBins

Capacity	2x1800
----------	--------

Discharge height	3005
------------------	------

Dimension

Length / Width / Height	6479 / 3000 / 4290 mm
-------------------------	-----------------------

Bin/wheel height	3000 / 2980 mm
------------------	----------------

Front/Rear track	2426 / 2522 mm
------------------	----------------

Bin discharge axle height	2805 mm
---------------------------	---------

Lifting	510 mm
---------	--------
